

Smart Eye

CE 2004/108/EC
2011/65/EU
EN 50498:2010

What is Smart Eye?

The Transmon Engineering Smart Eye system is a vehicle mounted camera and recording unit which enables management to review incidents that have occurred in the work place as the camera automatically stores the recorded footage from shortly before an impact and shortly after.

A simple USB connection allows fast data download using a PC or laptop, and the footage can be viewed in detail using the software supplied.

FEATURES

- Wide angle lens
- Event capture 10 seconds before and 10 seconds after detection
- Optional continuous recording mode for 2-16 hours (dependant on memory card capacity)
- On-board GPS provides precise vehicle location, plots the event and shows route taken.
- Continuously monitors truck speed
- 'Red button' trigger enables manual event capture
- 640 x 480 pixel viewing screen
- Works in very low light
- Up to 500 incident memory
- Fitting kit, power cable, memory card and software included

BENEFITS

- Increase site safety
- Increased driver accountability
- Reduced damage and resulting costs
